

Amendments to the Specification:

On page 10 after the last sentence, insert the following:

--The vehicle 3 may be provided with a control device 20 which includes means for determining the weight and the quantity of the goods and means for comparing the determined weight and quantity of the goods with a predetermined weight and quantity of goods. The control device 20 may further include identification means for indicating the goods to be removed.

The vehicle 3 may have an illumination device 22 for indicating and illuminating the pick location. Alternatively, a compartment indicator 24 may be provided on a rack 26 which forms the compartment in which the goods are stored.

If desired, the overhead suspended track 5 may be provided with a weighing device 28.

The vehicle 3 may be equipped with a protective device 30 for monitoring and securing the vehicle.--
